Should the contractor and/or surety fail to execute the documents within the time specified, the County shall have the right to proceed on the Bid Bond accompanying the bid.

If the County fails to execute the documents within the time limit specified, the Contractor shall have the right to withdraw the Contractor's bid without penalty.

24. Bidders may be required to furnish evidence that they maintain permanent places of business of a type and nature compatible with their Bid proposal, and are in all respects competent and eligible vendors to fulfill the terms of the specifications. Fulton County may make such investigations as it deems necessary to determine the ability of the Bidder to perform such work, and reserves the right to reject any Bidder

if evidence fails to indicate that the Bidder is qualified to carry out the obligation of the Contract and to complete the work satisfactorily.

29. The County may award any Bid in whole or in part to one or more vendors or reject all Bids and/or waive any technicalities if it is in the best interests of the County to do so. In the event that all Bids are not rejected, Bids for items including goods, materials, equipment, and services will be awarded to the lowest "responsible" Bidder(s) as determined by Fulton County. Submitting the lowest Bid, as published at the Bid opening, does not constitute an award or the mutual expectation of an award of a Contract and purchase order. For purposes of this notice and the attached Bid sheets, a purchase order is a Contract to provide items including goods, materials, equipment, and services and is intended to have the full force and effect of a Contract. A breach of the terms and conditions of a purchase order constitutes a breach of Contract.

Any such exclusion may cause prohibition of your firm from participating in any procurement by the Fulton County Government.
- (1) If the Offeror is unable to certify to any of the statements in this certification, such Offeror or subcontractor shall attach an explanation to this bid or proposal.

INSTRUCTIONS FOR CERTIFICATION

By signing and submitting this certification, the Offeror is providing the certification set out below:

- (1) The certification in this clause is a material representation of fact upon which reliance will be placed. If it is later determined that the prospective vendor knowingly rendered a false certification, the Purchasing Agent may pursue all available remedies, including suspension and/or debarment, for withdrawal of award or termination of a contract.
- (2) The prospective Offeror shall provide immediate written notice to the Purchasing Agent if at anytime the Offeror learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

DEBARMENT ORDINANCE

The following Section 2-322 of Fulton County Code of Laws establishes the procedure for the debarment of contractors.

(a) Authority to suspend.

As used in this section, the term entity means any business entity, individual, firm, contractor, subcontractor or business corporation, partnership, limited liability corporation, firm, contractor, subcontractor or business structured; provided, further, that any such entity shall also be subject to suspension under this section if any of its constituents, members, subcontractors at any tier of such entity's and the entity, or any constituent or member, knew or should have known of the commission of the act. Manhole extension rings shall be fabricated of domestic A-36 steel with a minimum thickness of $\frac{3}{4}$ " for the inner ring and minimum of $\frac{1}{2}$ " for the outer ring. The riser system shall use three, $\frac{1}{2}$ " cone head set screws to anchor to the manhole frame. The manhole adjustment ring shall fit the existing casting without interference and the manhole lid shall have a bearing on the entire surface of the inner ring to prevent rocking.

The lid shall be removable without binding. The inner and outer rings shall have a full circumferential weld to prevent and differential movement between the inner and outer rings under traffic loads. The inner and outer ring shall be fabricated to $\pm 1/16$ " concentricity.

The outer ring shall have an inside diameter no greater than $3/16$ " larger than the outside diameter of the manhole lid. All materials shall be bituminous asphalt coated. Riser rings shall be fabricated on a slope as required to conform to road contour. All welding shall be performed in accordance with AWS D1.5 Bridge Code b certified welders. Manhole extension rings shall be equal to East Jordan Ironworks.

Manholes and Precast Products

All manhole components, i.e., base sections, riser sections, conical sections and transition sections (spacers) shall be pre-cast concrete.

Pre-cast reinforced concrete manholes shall be manufactured in accordance with ASTM C-478 and ASTM C-76, Latest Revision Class II, Wall B, Type II Portland Cement, 4,000 psi. Reinforcing steel shall conform to ASTM A-185. Walls shall be 8 inches minimum or as shown on the Drawings.

Manhole table shall have a flow channel made to conform in shape and carrying capacity to that of the sewers.

Pre-cast manholes shall have a minimum 28 day cure time before delivery to the County.

The minimum inside diameter of manholes shall be 48 inches with an opening of 24 inches at the top of the cone.

Transition slabs or cones which convert bases larger than four feet in diameter to four foot diameter risers shall be designed by the manhole manufacturer to carry the live and dead loads exerted on the slab.

Precast tops shall be of the following three types:

- a) Concentric cone
- b) Eccentric cone
- c) Flat slab top

Precast base sections shall be of the following two types:

- a) Base riser section and separate base slab
- b) Base riser section with integral floor

The minimum wall thickness shall be one twelfth of the internal diameter of the riser or largest cone diameter.

The circumferential reinforcement in base sections, risers and conical top sections may consist of either one or two lines of steel, the total area per vertical foot of which shall be not less than 0.0025 times the inside diameter in inches. Flat slab tops shall have a minimum thickness of 6 inches for risers up to and including 48 inches in diameter and 8 inches for larger diameters. Slabs shall be reinforced with a layer of steel a minimum area of 0.12 in² per linear foot in both directions. Openings in flat slabs shall be additionally reinforced with a minimum of the equivalent of 0.20 in² of steel at 90 degrees. Straight rods used to reinforce openings shall have a minimum length equal to the diameter of the openings plus 2 inches.

The circumferential reinforcement in grade rings shall have an equivalent area of not less than 0.07 in² per vertical foot but not less than 0.024 in² in any one grade ring.

Base slabs or floors shall have a minimum length equal to the diameter of the opening plus 2 inches. Base slabs or floors shall be reinforced with a layer of steel with a minimum area of 0.12 in² per linear foot in both directions.

Supplier must be able to supply monolithic pre-cast invert systems for eight (8) inch pipe, when requested.

Placement of reinforcement: Where one line of circular reinforcement is used, it shall be placed in the center third of the wall. Where two lines of circular reinforcement are used, each line shall be so placed that the protective covering over the circumferential reinforcement in the wall of the section shall be 1 inch. Either the tongue or groove of the joint shall contain circumferential reinforcement equal in area to that of a single line within the wall of the section. The location of the reinforcement shall be subject, however, to the permissible variations in dimensions listed below.

In flat slab tops, the layers of reinforcement shall be placed near the bottom surface so that the protective cover over the reinforcement shall be 1 inch. Flat slab tops manufactured without a joint or other indication of the top or bottom of the slab shall be

manufactured with two layers of steel reinforcement, one located near the bottom surface and one near the top surface so that the protective cover over each layer is 1 inch. The exposure of the ends of the reinforcement shall not be a cause for rejection.

In base slabs or floors, the layer of reinforcement shall be placed above the mid-point, and the minimum protective cover over the reinforcement shall be 1 inch.

Reinforcement of a given total steel area may be composed of two layers if the layers are not separated by more than the thickness of one cross member plus 1/4 inch. The two layers shall be tied together to form a single rigid cage. All other specification requirements such as laps, welds and tolerances of placement in the wall of the manhole, risers and tops, etc. shall apply to this method of fabricating a line of reinforcement.

Longitudinal: Each line of circumferential reinforcement shall be assembled into a cage that shall contain sufficient longitudinal bars or members, extending through the wall of the manhole bases, risers and conical tops, to maintain the reinforcement rigidly in shape and correct position within the form. The exposure of the ends of stirrups or spacers that have been used to position the cages during the placement of the concrete shall not be a cause for rejection.

Laps, welds and spacing: If the splices are not welded, the reinforcement shall be lapped not less than 20 diameters for deformed bars, and 40 diameters for plain bars and cold-drawn wire. The spacing center to center of adjacent rings of circumferential reinforcement in a cage shall not exceed 6 inches for manhole risers and conical tops. The continuity of the circumferential reinforcing steel shall not be destroyed during the manufacture of the manhole risers and tops.

Joints: The reinforced concrete manhole base and riser sections, excepting grade rings, shall be formed with male and female ends so that when the manhole, compatible with the tolerances given under "permissible variations". The joints shall be of such design as will permit placement without appreciable irregularities in the interior wall surface of the manhole.

The bidder shall list on a separate sheet of paper any variations from, or exceptions to, the conditions and specifications of this bid. This sheet shall be labeled "exceptions to bid conditions", and shall be attached to bid.

Bid awarded will be made to the lowest responsible and responsive bidder. All items must be priced for consideration of award. The quality of the articles to be supplied, conformity with the specifications, the suitability to requirements, delivery terms, conditions and any guarantee clauses shall be taken into consideration. Vendor shall provide material data sheets describing product in detail.
